Search Notes

Dear Examiner GRAHAM:

Please find attached the results of your search for the above-referenced case. The search was conducted in Dialog, in EBSCOhost (mandatory I & PC Abstract databases) and in ProQuest (Financial Times database), as well as online. All mandatory databases for allowance were searched.

I have listed *potential* references of interest in the opening section of these search results. However, please be sure to review the entire report. There may be additional references that you find useful.

Please note that the results, after the potential references of interest, proceed through an Inventor search (which is provided without regard to priority date and in GREEN TEXT) and then to results in both Abstract and Full Text databases (which are more directly screened for priority date).

If you have any questions about the search, or need a refocus, please do not hesitate to contact me.

Thank you for using the EIC, and we look forward to your next search!

Production report of suspicious activity report in financial transaction, involves checking transaction information with certain criteria to producing report Original Titles: Systems and methods for producing suspicious activity reports in financial transactions Inventor: **COWELL J E... MORALES J M... MULLENEAUX M B** Alerting Abstract ...NOVELTY - A transaction processing device usable for purchase or redemption of money orders, travelers checks, etc., is configured to produce **suspicious activity report (SAR)**, based on certain criteria such as mandatory SAR threshold. On receiving a transaction information, it is checked using the criteria and a SAR containing the transaction information is generated, if it meets the criteria. ...USE - In financial transactions like purchase of money orders, travelers checks, loading of money, for smart cards, wire transfers, etc., for generating **suspicious activity reports (SAR)**, for preventing fraud, etc... ...ADVANTAGE - The SAR generation process is simplified... ...DESCRIPTION OF DRAWINGS - The figure shows a flowchart explaining the method for producing **suspicious activity reports**. Original Publication Data by Authority Argentina Publication No. Inventor name & address: **Morales, John M... Cowell, James E... Mulleneaux, Melanie B** Original Abstracts: A method of producing a **suspicious activity reports** includes storing configuration information at a transaction processing device. The configuration information configures the device to produce **suspicious activity reports** based on certain criteria. The method also includes receiving transaction information and determining, based on the transaction information and the certain criteria, whether a **suspicious activity report** is to be prepared. The method also includes generating a **suspicious activity report** containing at least some of the transaction information. **Claims:** What is claimed is: 1. A method of producing a **suspicious activity report**, comprising: storing configuration information at a transaction processing device, wherein the

configuration information configures the device to produce **suspicious activity** reports based on certain criteria; receiving transaction information; determining, based on the transaction information and the certain criteria, whether a **suspicious activity** report is to be prepared; and generating a **suspicious activity** report containing at least

-

The form was developed by FinCEN to enable Nevada casinos to comply with **mandatory** suspicious **activity** reporting rules applicable only to casinos in that state. However, FinCEN "encourages" casinos and card clubs in other U.S. jurisdictions to use the new...

...by FinCEN in December 1996 but have not yet been finalized. In announcing the new form, FinCEN says it intends to issue "sometime in 1997" **mandatory** suspicious **activity** reporting regulations for non-Nevada casinos and card clubs. "(U)ntil such a rule is published..., casinos and card clubs in jurisdictions other than Nevada... structuring that the casino could report as suspicious, including bribery, counterfeiting, credit card fraud and embezzlement. It also sets a new benchmark in U.S. **suspicion** reporting **criteria** by listing numerous tell-tale signs of **money** laundering that are not included in the bank SAR released by FinCEN in September 1995. They include large U.S. currency exchanges, large transactions with...

...instruments, use of multiple credit or deposit accounts, and unusual use of wire transfers. The casino SAR also goes beyond the requirements of the bank **SAR** by **asking** for the name and phone number of any law enforcement agents with whom the casino's employees have spoken concerning the activity. A key requirement...

...and Reporting Suspicious Casino Transactions and Activities" containing examples of suspicious casino activities. U.S. banks, which were promised similar guidance by FinCEN when their **mandatory** suspicious **activity** reporting duties took effect in April 1996, are still waiting for that compliance aid. The casino SAR must be filed with FinCEN at the IRS...

The evolution of the Bank Secrecy Act and its application in the banking industry: Issues and problems in the regulatory reporting of financial crimes

Author: Melofsky, Robert C.

Degree: M.A.

Year: 2001

Corporate Source/Institution: The University of Texas at Arlington (2502)

Supervisor: Robert L. Bing

Source: Volume 39/05 of MASTERS ABSTRACTS. of Dissertations Abstracts International.

PAGE 1330 . 78 PAGES

Descriptors: SOCIOLOGY, CRIMINOLOGY AND PENOLOGY ; BUSINESS ADMINISTRATION, BANKING ; LAW

Descriptor Codes: 0627; 0770; 0398

ISBN: 0-493-19223-9

Beginning with the passage of the Bank Secrecy Act (BSA) in 1970, financial institutions have been the focus of a series of regulatory efforts aimed at restricting the use of banks to disguise the proceeds of illegal activity. The most recent efforts appeared in the **form** of the **Suspicious Activity** Reporting System or SARS.

The primary goal of this paper is to assess the success of SARS in referring criminal cases to law enforcement agencies through a study of **Suspicious Activity Reports** completed by two financial institutions. The assessment is achieved through a review of information obtained from a sample of SARs supported by a search of related criminal records. Another goal is to provide descriptive data regarding financial crimes and their perpetrators using the same sample. This data is analyzed to identify common characteristics found in criminal cases that are successfully prosecuted in the courts.

Treatment: Practical (P)

Abstract: US banks are trying to get to grips with anti-terrorism legislation ushered in after the September 11th terrorist attacks. They must verify the identity of their customers at account opening, and **report suspicious activities**. The aim is to detect money-laundering. Without good IT systems, this has been found to be an impossible task. Suitable systems are briefly considered

City aids Met in laundering fight

UK: Rise in reporting of money laundering
Guardian (GN) 26 Nov 2002
Language: ENGLISH

Overall, police are pleased that money laundering reporting after 11 September has increased. Banks, stockbrokers, financial advisers, casinos and bureaux de change have all reacted so well that **reports of suspicious activity** have nearly doubled. Solicitors and accountants remain much more reticent though much to police chagrin. Only 1% of the 31,000 reports emanated from lawyers and only 0.35% came from accountants. 130 UK arrests have been made but only 59 charges were successfully up held. It is thought US\$ 50bn are laundered globally each year. So far this year UK police have recovered around GBt 10mn (US\$ 15.81mn). *

Wolfsberg-Gruppe verschUrft Kampf gegen Terror

Switzerland: Bank guidelines for terror accounts

NZZ Online (UDL) 29 Jan 2002

Language: GERMAN

The Wolfsberg Gruppe, a group of 12 Swiss banks of which UBS and Credit Suisse are members, has published guidelines for dealing with accounts suspected of being used to finance terrorist organisations. The guidelines claim that unlike in cases of money-laundering, money that is used to finance terrorism has not necessarily been obtained illegally, and this means that governments and banks must work together more than ever before. According to the group, the most important tool for this coordination is the lists of suspected terrorists, as a result of which the banks can **report suspicious activities**. It was seen as important that the banks were able to **report suspicious activities** without breaching client confidentiality, and that the guidelines for client identification were strictly observed.

Company: UBS; CREDIT SUISSE

Product: Retail Banking Services (6006); Clearing Banks (6010CB); Commercial Banks (6020);

Event: National Government Economics (94); Law & Order (98);

Country: Switzerland (5SWI);
